ADVANCED INSIGHTS

Gain insights into all essential areas of your retail store software:

Customer Purchase History

Leverage valuable insights to discover what products your customers are purchasing the most.

Inventory Analysis

Better automate and manage back office operations and gain more insights into your business.

Sales & Promotions

Track the sales your business makes and how customers interact with your hand-crafted sales and promotions.

Sales Forecasting

Predict what sales will be like based on historical data so your operations can create an effective plan for the future.

Reporting & Analytics

Generate custom reports to view the data you need to make the best decisions for your operations.

Product Movement

From purchase orders processing, through inventory control, and accounts receivable, know where products are across your operations.
